# FUNCTIONAL FAMILY THERAPY

Functional Family Therapy (FFT) is an effective, short-term evidence-based family counseling service designed for 11-18 year-old youth whose families have involvement with DCF, the child is at risk of being removed from the home or losing their placement, or are returning home from a residential or out of home placement. To refer, call us at 850-266-2704 or complete the attached referral.

★ FFT works with a young person's entire family and other providers to facilitate positive growth and development.

★ Our effectiveness stems from the idea that families are not identical - they have a unique set of circumstances.

★ Our treatment plans are individualized to fit the specific needs of youth and their families.
